

CONTENTS

Power Systems and Power Electronics

- e136213 **Green energy transformation in Poland**
Jan Kiciński
- e135838 **Main aspects influencing the evaluation of atmospheric overvoltages in high-voltage networks**
Michał Borecki, Maciej Ciuba, Yevhen Kharchenko, Yuriy Khanas
- e136190 **A decentralized control strategy to bring back frequency and share reactive power in isolated microgrids with virtual power plant**
Amir Khanjanzadeh, Soodabeh Soleymani, Babak Mozafari
- e136037 **The effect of protrusions on the initiation of partial discharges in XLPE high voltage cables**
Mohammad AlShaikh Saleh, Shady S. Refaat, Marek Olesz, Haitham Abu-Rub, Jarosław Guziński
- e135839 **Six-phase doubly fed induction machine-based standalone DC voltage generator**
Paweł Maciejewski, Grzegorz Iwański
- e136043 **A novel quasi-resonant ZVS boost converter with tapped inductor**
Jakub Dawidziuk, Michał Harasimczuk
- e136040 **Electromagnetic AC and impulse levitations of conductive, dielectric, and magnetic ball**
Dariusz Spalek
- e135841 **Computation method for analysis of sliding faults in power systems**
Jan Machowski, Sylwester Robak
- e136216 **An application of continuous wavelet transform and wavelet coherence for residential power consumer load profiles analysis**
Piotr Kapler
- e136218 **An active power filter based on a hybrid converter topology – Part 1**
Michał Gwóźdź, Łukasz Ciepliński

Artificial and Computational Intelligence

- e135842 **The identification method of the coal mill motor power model with the use of machine learning techniques**
Zofia Magdalena Łabęda-Grudziak, Mariusz Lipiński
- e136210 **Recognition of handwritten Latin characters with diacritics using CNN**
Edyta Lukasik, Małgorzata Charytanowicz, Marek Milosz, Michail Tokovarov, Monika Kaczorowska, Dariusz Czerwinski, Tomasz Zientarski
- e136044 **Ensemble selection in one-versus-one scheme – case study for cutting tools classification**
Izabela Rojek, Robert Burduk, Paulina Heda
- e136300 **Speech emotion recognition using wavelet packet reconstruction with attention-based deep recurrent neural networks**
Hao Meng, Tianhao Yan, Hongwei Wei, Xun Ji
- e135401 **OECD Recommendation's draft concerning access to research data from public funding: A review**
Lech Madeyski, Tomasz Lewowski, Barbara Kitchenham

Material Science and Nanotechnology

- e136214 **Shot peening effects on fatigue life, corrosion behavior and surface roughness of a low carbon alloy steel**
C. Selva Senthil Prabhu, P. Ashok Varthanan, T. Ramkumar
- e135835 **Optimization of tribology parameters of AZ91D magnesium alloy in dry sliding condition using response surface methodology and genetic algorithm**
M. Beniyel, M. Sivapragash, S.C. Vettivel, P. Senthil Kumar, K.K. Ajith Kumar, K. Niranjan
- e136215 **Effect of SiO₂ flux on the depth of penetration, microstructure, texture and mechanical behavior of AA6063 T6 aluminum alloy using activated TIG welding**
Rajiv Kumar, S.C. Vettivel, Harmesh Kumar Kansal
- e136045 **Protection properties of conversion coatings based on nitrates for resorbable Mg alloy**
Katarzyna Cesarz-Andraczke
- e136211 **Investigations on the effects of nitrogen gas in CNC machining of SS304 using Taguchi and Firefly Algorithm**
P. Prasanth, T. Sekar, M. Sivapragash

Control and Informatics

- e135836 **Rack cell configuration problem: a mathematical model and effective combined heuristic**
Andrzej Ratkiewicz, Konrad Lewczuk
- e135837 **Static anti-windup compensator based on BMI optimisation for discrete-time systems with cut-off constraints**
Dariusz Horla
- e136041 **Extremal values of differential equations with application to control systems**
Henryk Górecki, Mieczysław Zaczek
- e135843 **Fractional order, discrete model of heat transfer process using time and spatial Grünwald-Letnikov operator**
Krzysztof Oprzędkiewicz

Civil Engineering

- e136039 **Accuracy assessment of linear elasticity solution for interaction of cylindrical tank with subsoil**
Paweł Marek Lewiński
- e135840 **Direct least squares and derivative-free optimisation techniques for determining mine-induced horizontal ground displacement**
Janusz Rusek, Krzysztof Tajduś
- e136042 **Microscopic methods for analysis of mortars from historical masonry structures**
Zdzisława Owsiak

Biomedical Engineering and Biotechnology

- e135834 **Estimation of random bio-hydrodynamic lubrication parameters for joints with phospholipid bilayers**
Krzysztof Wiercholski, Andrzej Miszczak
- e136187 **Automatic batch sedimentation test based on histogram back-projection image analysis**
Witold Nocoń, Jakub Pośpiech, Jacek Kopciński
- e136212 **Towards microfluidics for mycology – material and technological studies on LOCs as new tools ensuring investigation of microscopic fungi and soil organisms**
Agnieszka Podwin, Tymon Janisz, Katarzyna Patejuk, Piotr Szyszka, Rafał Walczak, Jan Dziuban

Varia

- e136217 **Longitudinal automatic carrier-landing control law rejecting disturbances and coupling based on adaptive dynamic inversion**
Lipeng Wang, Zhi Zhang, Qidan Zhu, Zixia Wen
- e136036 **Theoretical and experimental analysis on the interaction properties between tracks and sediments considering sand content for unmanned underwater tracked bulldozer**
Yong Li, Dingchang He, Qiaorui Si
- e136038 **Thermal navigation for blind people**
Paweł Marzec, Andrzej Kos
