
CONTENTS OF CHEMICAL AND PROCESS ENGINEERING VOL. 39, 2018

ISSUE 1

T.J. Jaworski, K. Pikoń, M. Kajda-Szcześniak, Experimental and theoretical modeling of waste combustion in a chamber with a moving grate	3
T. Dziubak, Potential design improvements of a reverse flow mini-cyclone with a tangential inlet .	15
A. Ciemięga, K. Maresz, J.J. Malinowski, J. Mrowiec-Białoń, Comparative study of continuous-flow microreactors based on silica monoliths modified with Lewis acid centres	33
I. Grubecki, Optimal feed temperature for an immobilized enzyme fixed-bed reactor: A case study on hydrogen peroxide decomposition by commercial catalase	39
B. Hernik, K. Jagodzińska, D. Matuszek, Numerical studies on the influence of air staging on the temperature of flue gas and emission of gases in the combustion chamber of OP 230 boiler	59
D. Mikielwicz, J. Wajs, J. Mikielwicz, Alternative cogeneration thermodynamic cycles for domestic ORC	75
T. Waclawczyk, M. Schäfer, Verification of a binary fluid solidification model using semi-analytical solution of 1D heat diffusion equation	85
A. Borsukiewicz, P. Stawicki, Comparative analysis of efficiency of waste heat conversion in low-temperature Brayton cycle	103
J. Badur, M. Lemański, T. Kowalczyk, P. Ziółkowski, S. Kornet, Verification of zero-dimensional model of SOFC with internal fuel reforming for complex hybrid energy cycles	113
G. Król, M. Szukiewicz, Conditions of dead zone forming in porous catalyst pellets	129

ISSUE 2

T. Zinko, P. Pianko-Oprych, Z. Jaworski, Three-Dimensional Computational Fluid Dynamics modelling of a Proton Exchange Membrane Fuel Cell with a serpentine micro-channel design	143
J. Marszałek, M. Tylman, P. Rdzanek, W. Kamiński, The influence of hydrodynamic conditions on the recovery of acetone, butanol and ethanol in pervaporation membrane modules	155
J.M. Kościelny, M. Syfert, Robust diagnostics of complex chemical processes: Main problems and possible solutions	165

K. Ćwirko, E. Tomczak, D. Szaniawska, Membrane fouling in the ultrafiltration of water–protein–sodium chloride model systems	185
K. Pałaszńska, M. Juszcak, Gaseous emissions during agricultural biomass combustion in a 50 kW moving step grate boiler	197
M. Szwał, Z. Szwał, Numerical interpretation of a mathematical model of membrane gas separation with energy transfer by gas flowing in a channel to gas penetrating this channel from the adjacent channel	209
M. Wójcik, M. Szukiewicz, Mathematical modelling of gas flow and determination of axial gas dispersion coefficients using numerical inverse Laplace transform and Maple® in a typical commercial apparatus	223
T. Kotkowski, R. Cherbański, E. Molga, Acetone adsorption on CO ₂ -activated tyre pyrolysis char – Thermogravimetric analysis	233

ISSUE 3

S.J. Kowalski, Intensification of drying processes due to ultrasound enhancement	251
J. Banaszak, A. Pawłowski, Influence of ultrasound assist during hot air drying on properties of dried apple crisps	263
M. Szwał, Modelling the gas flow in permeate channel in membrane gas separation process	271
J. Latocha, M. Wojasiński, P. Sobieszuk, T. Ciach, Synthesis of hydroxyapatite in a continuous reactor: A review	281
M. Borysiak, E. Gabruś, Ceramic membrane fouling in ultrafiltration process of chicken egg white aqueous solution	295
K. Zabielska, T. Aleksandrak, E. Gabruś, Adsorption equilibrium of carbon dioxide on zeolite 13X at high pressures	309
A.A. Atlaskin, A.N. Petukhov, N.R. Yanbikov, M.E. Salnikova, M.S. Sergeeva, V.M. Vorotyntsev, I.V. Vorotyntsev, Evaluation of the absorbing pervaporation technique for ammonia recovery after the haber process	323
K. Ulatowski, P. Sobieszuk, Influence of liquid flowrate on size of nanobubbles generated by porous-membrane modules	335

ISSUE 4

Editor's notes. In honour of Professor Andrzej Burghardt on the occasion of his 90th birthday ...	351
G. Bińczak, R. Pohorecki, W. Moniuk, C. Możeński, Investigation of new potential amine activators for carbon dioxide absorption in carbonate solutions	353
J. Mrowiec-Białoń, A. Ciemięga, K. Maresz, K. Szymańska, W. Pudło, A.B. Jarzębski, Review on hierarchically microstructured monolithic reactors for high yield continuous production of fine chemicals	367
P. Pianko-Oprych, Z. Jaworski, T. Zinko, M. Palus, A review of the numerical studies on planar and tubular Solid Oxide Fuel Cells within four EU projects of the 7th framework programme ..	377

A. Gąszczak, G. Bartelmus, I. Greń, A. Rotkegel, D. Janecki, Kinetics of cometabolic biodegradation of 4-chlorophenol and phenol by <i>Stenotrophomonas maltophilia</i> KB2	395
R. Przekop, I. Majewski, A. Moskal, Modelling of erythrocytes behaviour in blood capillaries by structural model combined with lattice-Boltzmann approach	411
R. Cherbański, E. Molga, Sorption-enhanced steam methane reforming (SE-SMR) – A review: Reactor types, catalysts and sorbents characterization, process modelling	427
M. Jaschik, M. Tańczyk, A. Janusz-Cygan, A. Wojdyła, K. Warmuziński, The separation of carbon dioxide from CO ₂ /N ₂ /O ₂ mixtures using polyimide and polysulphone membranes	449
P. Gluszczyk, A. Klepacz-Smółka, S. Ledakowicz, Experimental evaluation of a helical laboratory photobioreactor for cultivation of thermophilic cyanobacteria – Hydrodynamics and mass transfer studies	457
J. Bałdyga, M. Jasińska, M. Dziegielewska, M. Żochowska, Effect of sonication reactor geometry on cell disruption and protein release from yeast cells	475
I. Grubecki, Optimal feed temperature for hydrogen peroxide decomposition process occurring in the bioreactor with fixed-bed of commercial catalase: A case study on thermal deactivation of enzyme	491
