

CONTENTS

Control, Informatics and Robotics

- 3 A universal architectural pattern and specification method for robot control system design**
Tomasz Kornuta, Cezary Zieliński, Tomasz Winiarski
- 31 Blocks for two-machines total weighted tardiness flow shop scheduling problem**
Wojciech Bożejko, Mariusz Uchroński, Mieczysław Wodecki
- 43 Non integer order, state space model of heat transfer process using Atangana-Baleanu operator**
Krzysztof Oprzędkiewicz

Power Systems & Power Electronics

- 51 Properties of active rectifier with LCL filter in the selection process of the weighting factors in finite control set-MPC**
Piotr Falkowski, Andrzej Sikorski, Krzysztof Kulikowski, Marek Korzeniewski
- 61 Low voltage modular circuit breakers: FEM employment for modelling of arc chambers**
Michał Szulborski, Łukasz Kolimas, Sebastian Łapezyński, Marcin Świetlik
- 71 Balancing reactive compensation at three-phase four-wire systems with a sinusoidal and asymmetrical voltage source**
Zbigniew Sołjan, Grzegorz Hołdyński, Maciej Zajkowski
- 81 Large-signal averaged models of the non-ideal flyback converter derived by the separation of variables**
Jarosław Kraśniewski, Włodzimierz Janke, Maciej Bączek
- 89 Analysis of the influence of current frequency on the thermal field of the insulated busbar**
Jerzy Gołębiowski, Marek Zaręba

Material Science & Nanotechnology

- 99 Optimization of process parameters of friction stir welded AA5082-AA7075 butt joints using resonance fatigue properties**
Gaurav Kumar, Rajeev Kumar, Ratnesh Kumar
- 109 Analysis of advanced additive technology in direct metal laser sintering and precision casting method**
Jan Robl, Josef Sedlak, Zdenek Pokorny, Petr Nuksa, Jozef Majerik, Igor Barenyi
- 119 PEO layers on Mg-based metallic glass to control hydrogen evolution rate**
Katarzyna Cesarz-Andraczke, Alicja Kazek-Kęsik
- 125 Characterization of nanostructured bulk cobalt triantimonide doped with tellurium and indium prepared by pulsed plasma in liquid method**
Rafał Zybala, Maksymilian Schmidt, Kamil Kaszyca, Marcin Chmielewski, Mirosław Kruszewski, Marcin Jasiński, Maria Rajska, Łukasz Ciupiński

Electronics, Telecommunication and Optoelectronics

- 135 Four-point probe resistivity noise measurements of GaSb layers**
Lukasz Ciura, Andrzej Kolek, Dariusz Smoczyński, Agata Jasik
- 141 Wigner transform approach to dynamic-variable partially coherent laser beam characterization**
Jan Jabczyński, Przemysław Gontar, Lukasz Gorajek
- 147 ITO layer as an optical confinement for nitride edge-emitting lasers**
Maciej Kuc, Adam Sokol, Łukasz Piskorski, Maciej Dems, Michał Wasiak, Robert Sarzała, Tomasz Czystanowski

Varia

- 155 Strategies for reduction of energy consumption during ascending and descending process of modern telescopic HAPS aerostats**
Lech Knap, Cezary Graczykowski, Zbigniew Wołęjsza, Jan Holnicki-Szulc
- 169 Application of acoustic emission to monitoring the course of the alkali-silica reaction**
Grzegorz Świt, Justyna Zapala-Sławeta
