

CONTENTS

Odour Intensity Close to Detection Threshold – Joanna Kośmider, Beata Krajewska, Monika Sosiałuk	3
Artificial Neural Networks in Air Pollution Prediction – Importance of Input Variables – Wioletta Rogula, Jacek Żeliński	15
Various Structures of Struvite Crystals – Jan Suschka, Eligiusz Kowalski, Sebastian Popławski	27
Struvite Precipitation and Simultaneous Ammonia Removal – Jan Suschka, Sebastian Popławski	43
Pollution Degree and Sanitary State Indicator Bacteria as the Indicators of the Purity of Lake Hańcza Waters – Anna Gotkowska-Płachta, Ewa Korzeniewska, Stanisław Niewolak	53
<i>Escherichia Coli</i> and other Groups of Opportunistically Pathogenic and Pathogenic Bacteria in the Offshore Water of the Lake Wigry – Ewa Korzeniewska	69
Impact of Anthropogenic Pressure on Aquatic Conditions in Lake Track in Olsztyn – Jolanta Grochowska, Helena Gawrońska	85
Hydro-chemical Characteristic of Czerniawka River – Witold Nocoń, Maciej Kostecki ..	95
Utilization of Different Carbon Compounds by Sulphate-reducing Bacteria in Mediums with Phosphogypsum – Dorota Wolicka, Włodzimierz Kowalski	105

Communications

Determination of Trace Elements in Classroom Aerosols – Bernard Poędnik, Dariusz Węgrzynek	113
