

# Bulletin of the Polish Academy of Sciences Technical Sciences (BPASTS)

Volume 71, No. 1

February 2023

## CONTENTS

### Special Section

- e144589 **Lightweight structures in civil engineering – contemporary problems**  
Jacek Szafran, Alphose Zingoni, Maria Pia Repetto, and Marcin Kamiński
- e144581 **Damage localization in truss girders by an application of the discrete wavelet transform**  
Anna Knitter-Piątkowska, Olga Kawa, and Michał J. Guminiak
- e144580 **Influence of rotary flexibility of joints on the statics and dynamics of the arch structures**  
Magdalena Łasecka-Plura, Zdzisław Pawlak, and Martyna Zak-Sawiak
- e144579 **The influence of a polyurea coating on bent reinforced concrete beams with various reinforcement ratios**  
Jacek Szafran, Artur Matusiak, Katarzyna Rzeszut, and Iwona Jankowiak
- e144578 **Experimental and numerical analyses of airflow around two cylinders angled to the direction of wind**  
Agnieszka Padewska-Jurczak, Piotr Szczepaniak, and Ryszard Walentynski
- e144577 **Analysis of scaffolding harmonic excitation**  
Jarosław Bęc, Ewa Błazik-Borowa, and Jacek Szer
- e144576 **Probabilistic estimation of diverse soil condition impact on vertical axis tank deformation**  
Kamil Zyliński and Jarosław Górski
- e144574 **Qualitative and quantitative analysis of tensegrity domes**  
Paulina Obara, Maryna Solovei, and Justyna Tomasik

### Artificial and Computational Intelligence

- e144478 **Environmental analysis of a product manufactured with the use of an additive technology – AI-based vs. traditional approaches**  
Ewa Dostatni, Anna Dudkowiak, Izabela Rojek, and Dariusz Mikołajewski
- e144584 **A few-shot fine-grained image recognition method**  
Jianwei Wang and Deyun Chen
- e144586 **A novel hybrid cuckoo search algorithm for optimization of a line-start PM synchronous motor**  
Łukasz Knypiński

### Control and Informatics

- e143551 **Continuous update of business process trees using Continuous Inductive Miner**  
Tomasz P. Pawlak and Bartosz Górka
- e144582 **Assessment of benefits resulting from the use of computer control systems in precision agriculture**  
Mariusz R. Rząsa
- e144587 **Conceptualization of Industry 4.0 technology for the production of tailor-made furniture – a case study**  
Krzysztof Łukaszewicz, Wiesław Urban, and Elżbieta Krawczyk-Dembicka

### Electronics, Telecommunication and Optoelectronics

- e143645 **A new closed-form formula for calculating a weakly singular static potential integral with linear current source distribution on a triangle**  
Anna Grytsko and Piotr Słobdzian
- e144583 **Testing and modeling of constant magnetic field cylindrical magnetolectric sensors output characteristics**  
Karol Kuczyński, Piotr Bilski, Adrian Bilski, and Jerzy Szymański

### Material Science and Nanotechnology

- e144575 **Quantum magnetostriction effect resulting from the asymmetric structure of matter measured with EPR spectrometer**  
Marek Sikoń and Ewa Bidzinska
- e144585 **Assessment of surface waviness of casting patterns made using 3D printing technologies**  
Paweł Zmarzły, Damian Gogolewski, and Tomasz Kozior

### Civil Engineering

- e144453 **Photogrammetry-based approach for collecting and processing information about an existing building**  
Robertas Kontrimovičius, Michał Juszczyk, Agnieszka Lesniak, Leonas Ustinovichius, and Czesław Miedziałowski
