

FAREWELL

Roads of active people meet when they are searching for challenges, inspirations and joint actions.

As a student involved in student organizations, Rector Janina Józwiak encouraged me to take on the issues going beyond the regular university education, ambitious from the social, organizational and scientific point of view.

I got involved professionally with the Institute of Statistics and Demography as a trainee at the beginning of the fourth year of my studies. Another challenge was to stand in front of my fellow students as their teacher.

... and more ideas for future activities. How to put them all together? Welfare, professional and scientific work. As Professor Józwiak's assistant, I found acceptance and encouragement to be unconventional and versatile. I received independence and understanding.

Roads of active people meet when they place confidence and wholeheartedness in each other while searching for challenges, inspirations and joint actions.

Janina Józwiak will remain in my memory as a great and warm person, splendid teacher and leader. Approachable, ordinary, understanding, eloquent and witty.

Good person.

Friend.

I would like to thank Professor Józwiak for her openness to dialogue and views, scientific and personal honesty.

Stanisław Kluza, PhD

student, assistant

Institute of Statistics and Demography

Collegium of Economic Analyses, Warsaw School of Economics
